

CREATE A DATABASE IN CLOUDANT DB

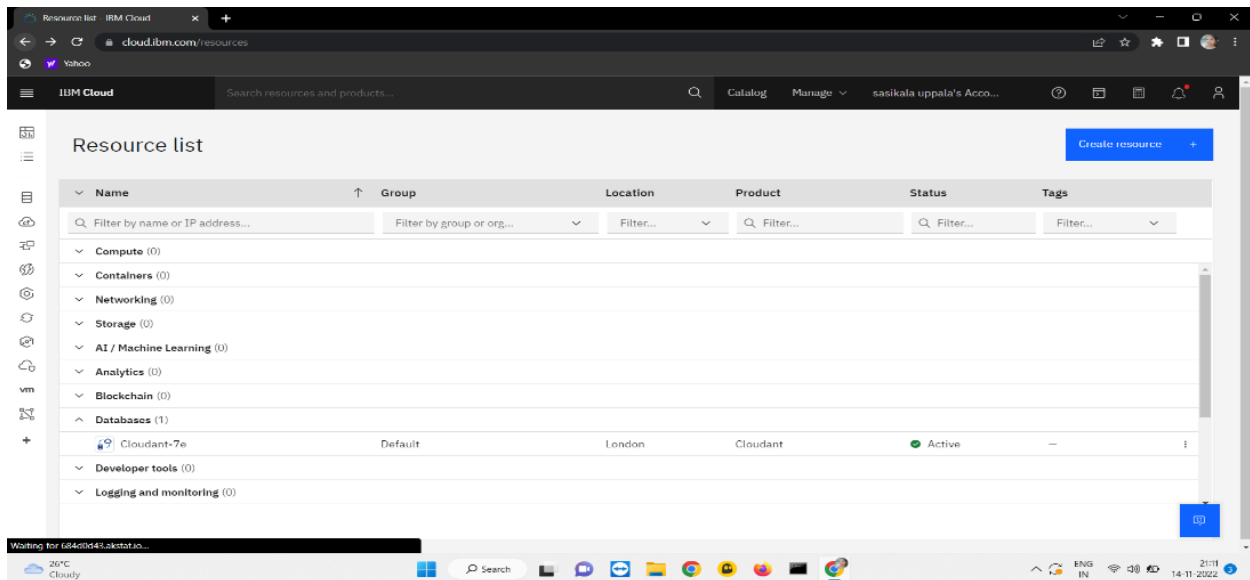

TEAM ID	PNT2022TMID51132
PROJECT NAME	IOT BASED SMART CROP PROTECTION SYSTEM FOR AGRICULTURE
TEAM MEMBERS	Aarathi,Backiyalakshmi,Jayashree,Nivenithaasri

STEP1: Login to IBM cloud using your account details

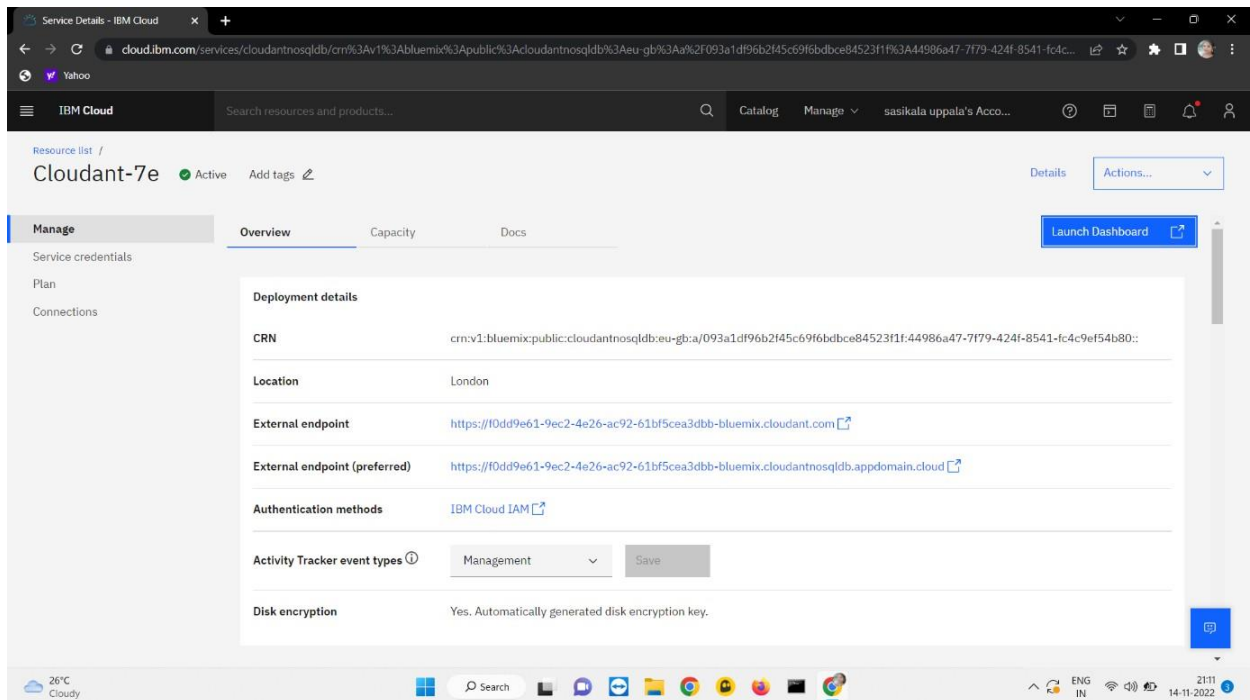

STEP2: Go to resource list

STEP3: In resource list select data base in that you see the active status of cloudant service and click on that cloudant.

STEP4: After that you can observe “Launch Dashboard” at the top in blue box click on it.

STEP5: Then it will open as below and to create Database click on the create database as you see below.

STEP6:Then fill the details and click on the create.

The screenshot shows the Cloudant Dashboard interface. The main area displays a table of databases. A modal titled 'Create Database' is open on the right side, allowing the user to create a new database.

Databases Table:

Name	Size	# of Docs	Partitioned
data	134 bytes	1	No

Create Database Modal:

- Database name:** database-name
- Partitioning:**
 - ☒ Non-partitioned - recommended for most workloads
 - ☐ Partitioned
- Which should I choose?** (Help link)

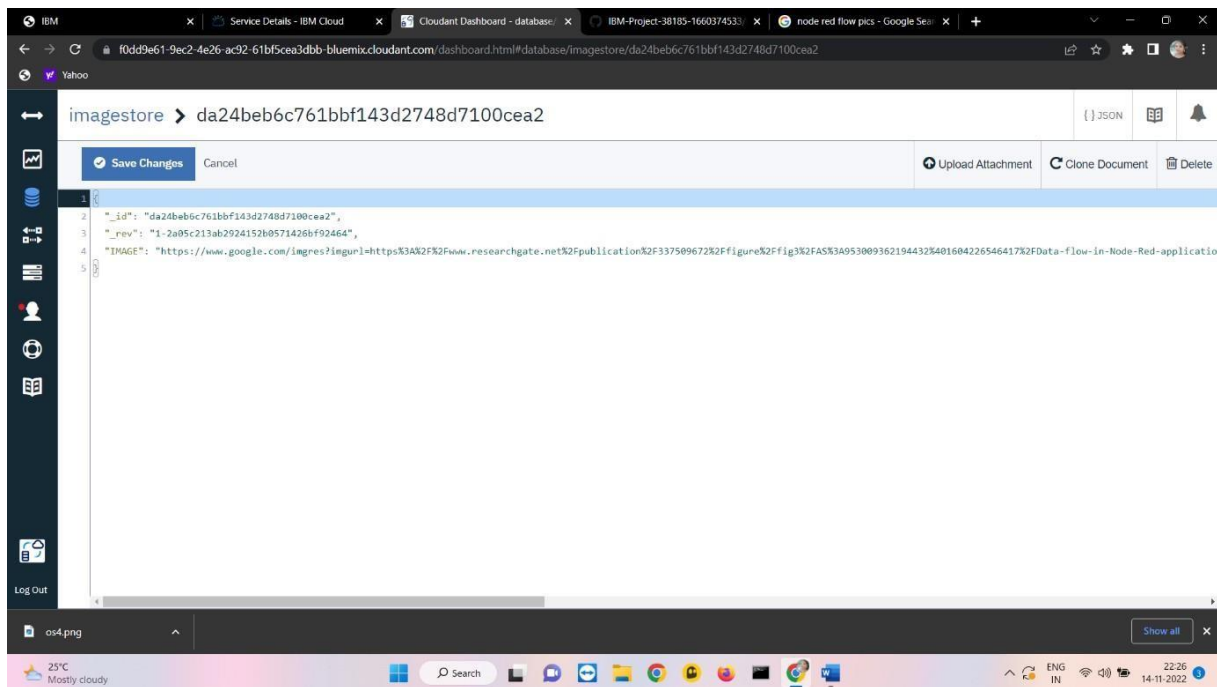

Buttons: Cancel, Create

Showing 1-1 of 1 database

STEP7: So you can data base is created successfully

STEP8: Now to create document in this database click on create document like this you can create document for creating database to store the image URL

STEP9: Therefore document is created.
