

# CREATE A CLOUD OBJECT STORAGE SERVICE

TEAMID	PNT2022TMID51132
PROJECT NAME	IOT BASED SMART CROP PROTECTION SYSTEM FOR AGRICULTURE
TEAM MEMBERS	Aarthi,Backiyalakshmi,Nivenithaasri,Jayashree

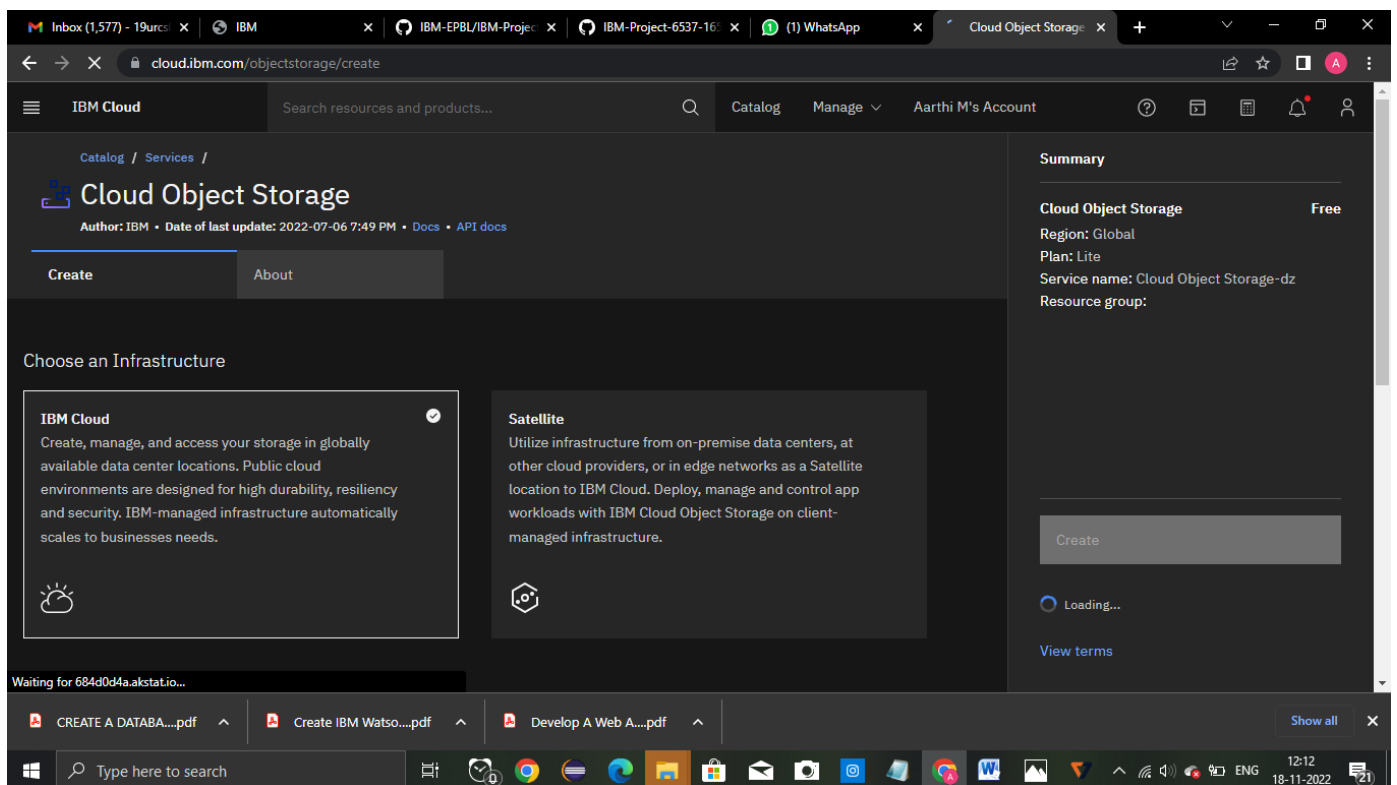

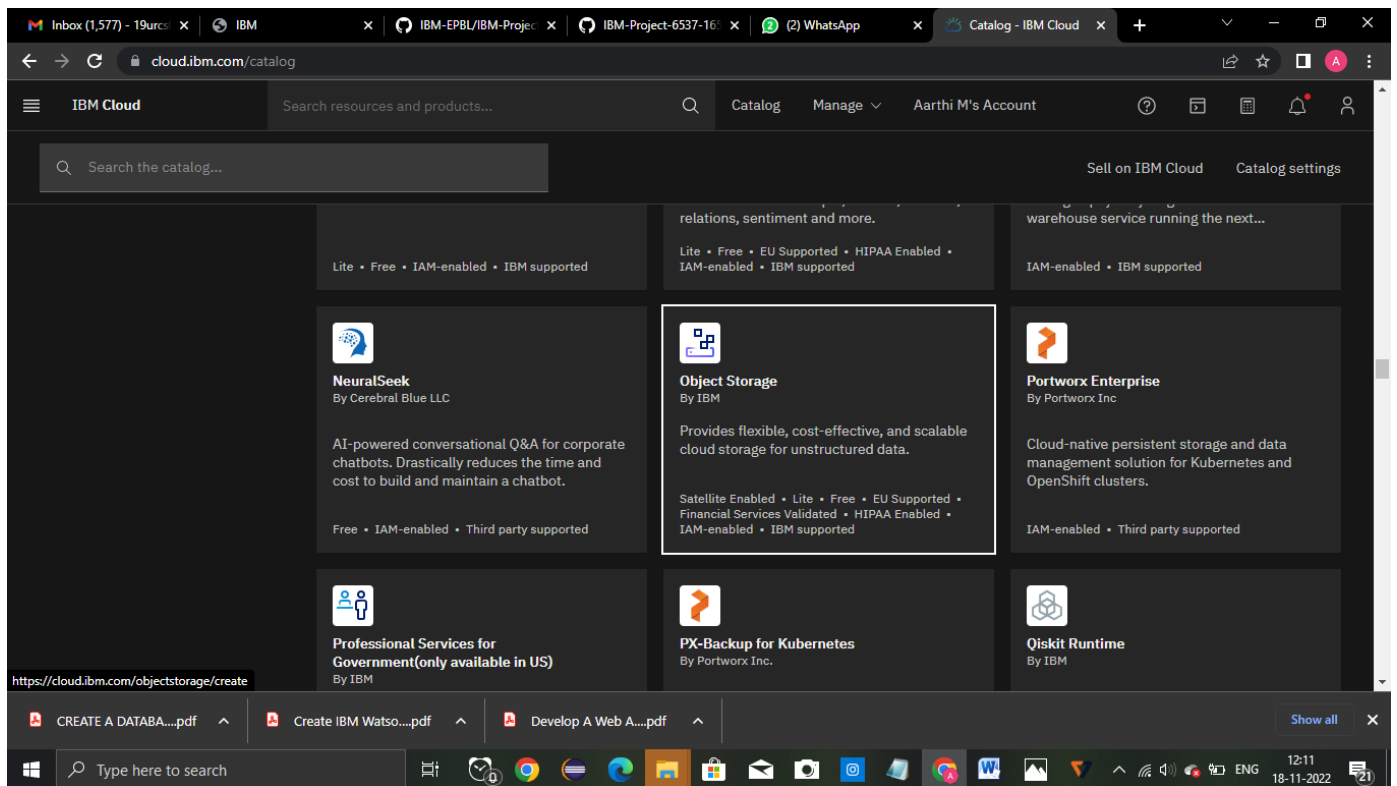

## STEP1: Login to your IBM cloud account.

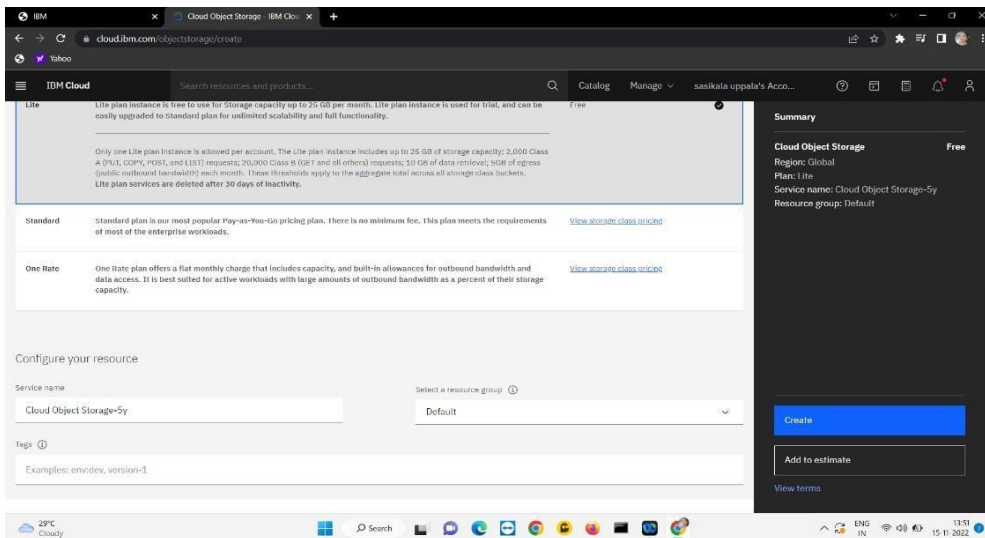

## STEP2: Open the catalog. Then click on the storage.

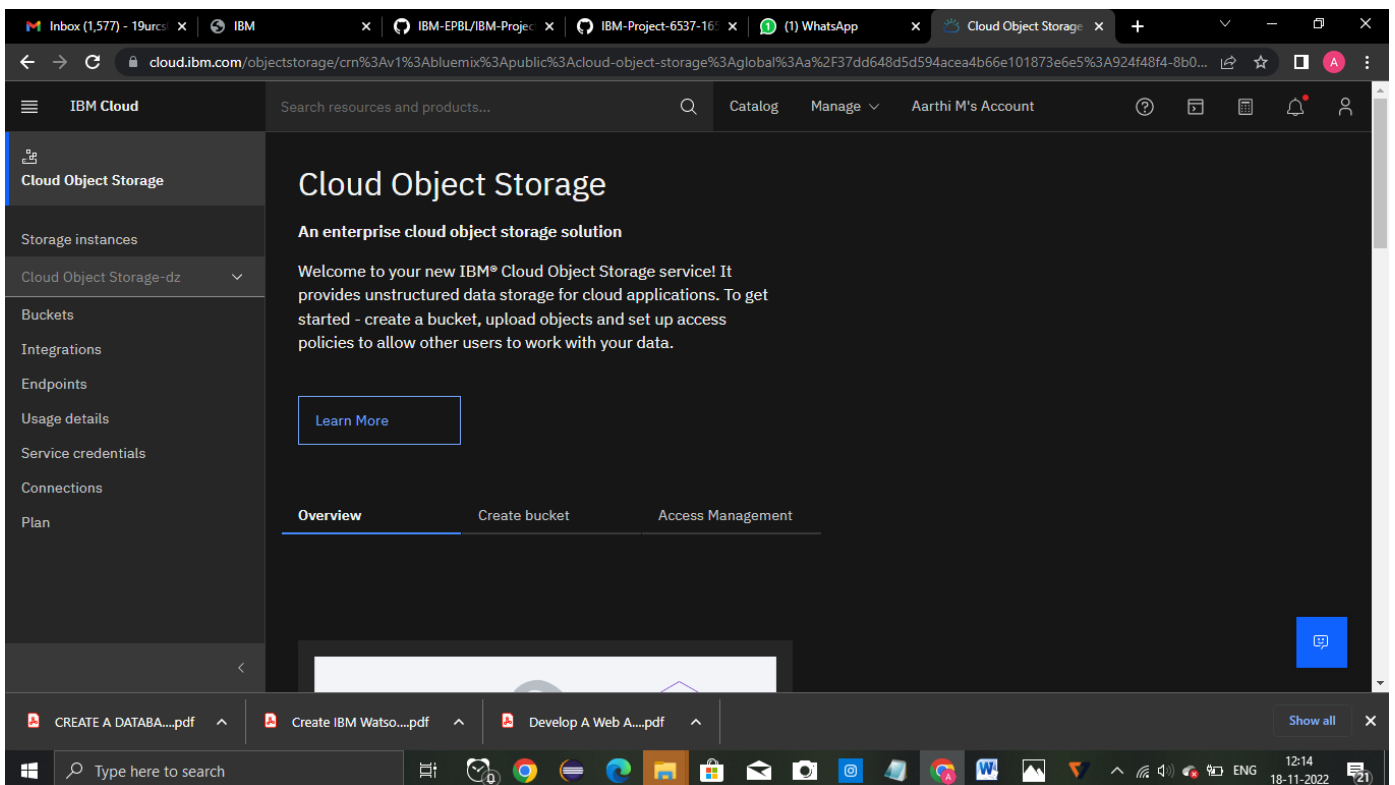

STEP3: Then if you scroll down you observe object storage and click on it.

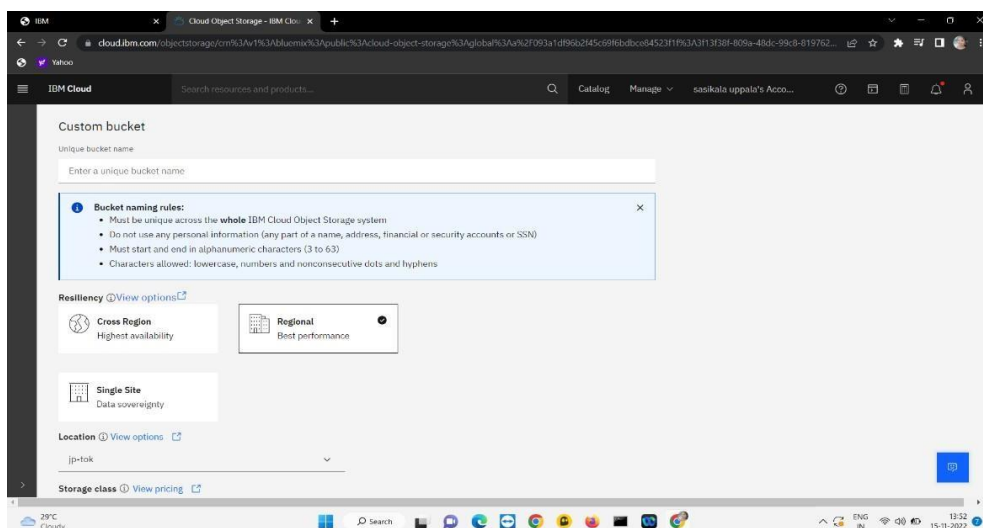

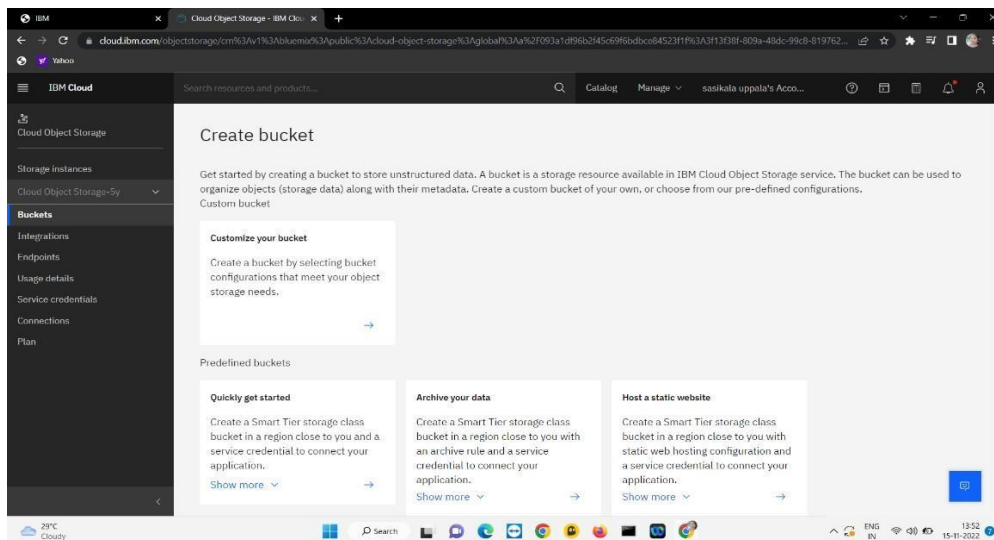

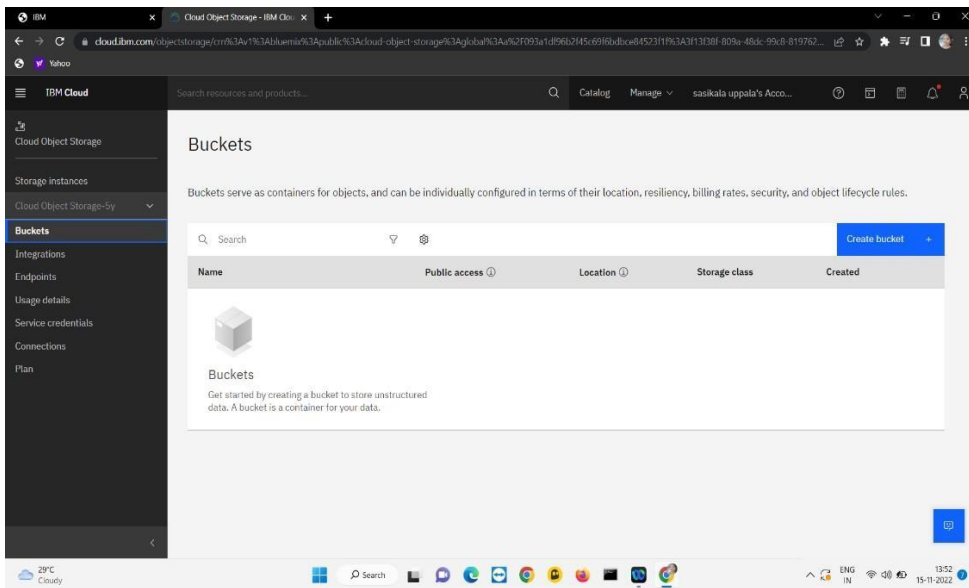

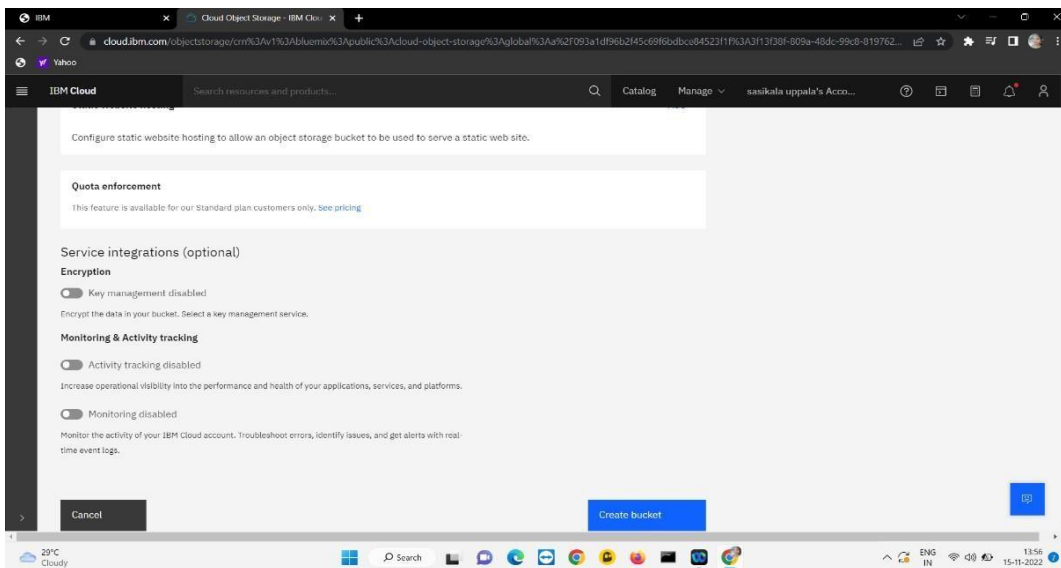

STEP5: Therefore creation of cloud object storage is created.

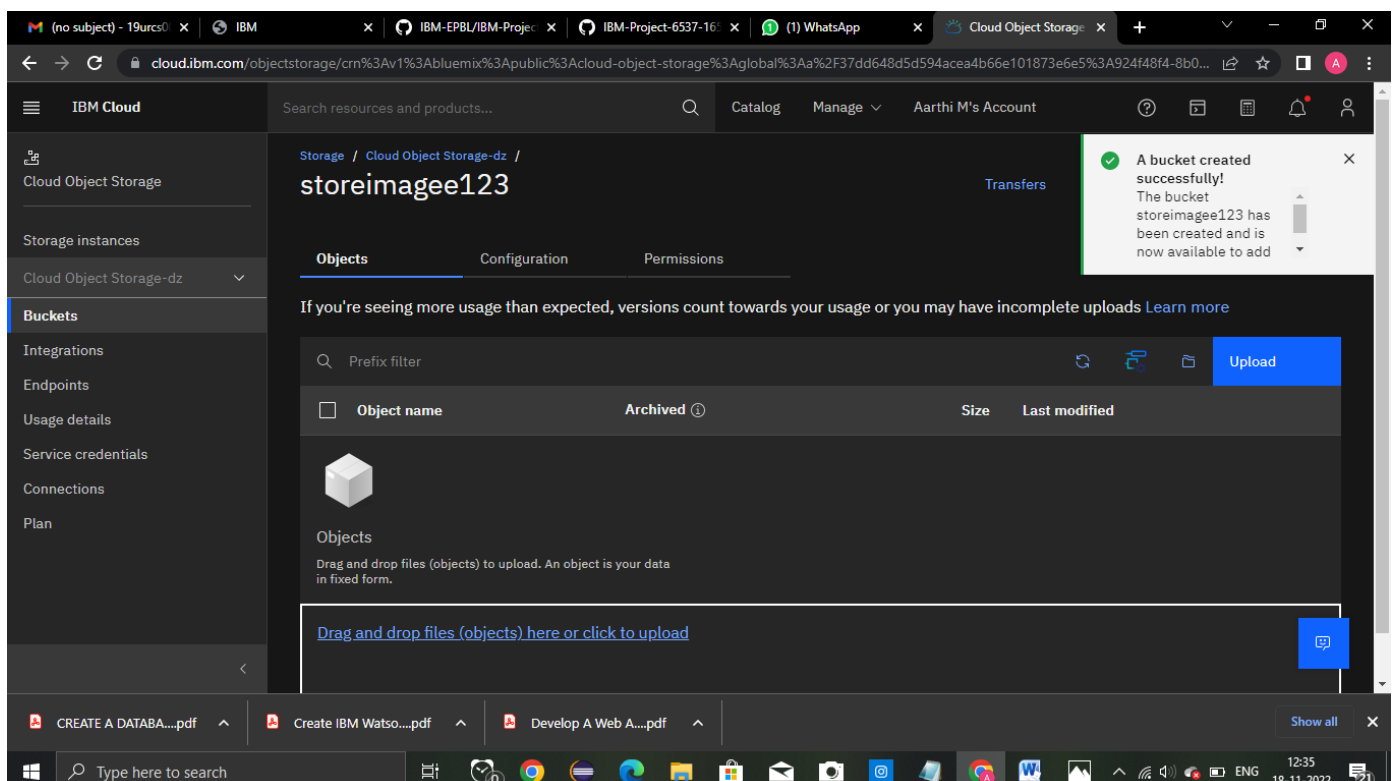

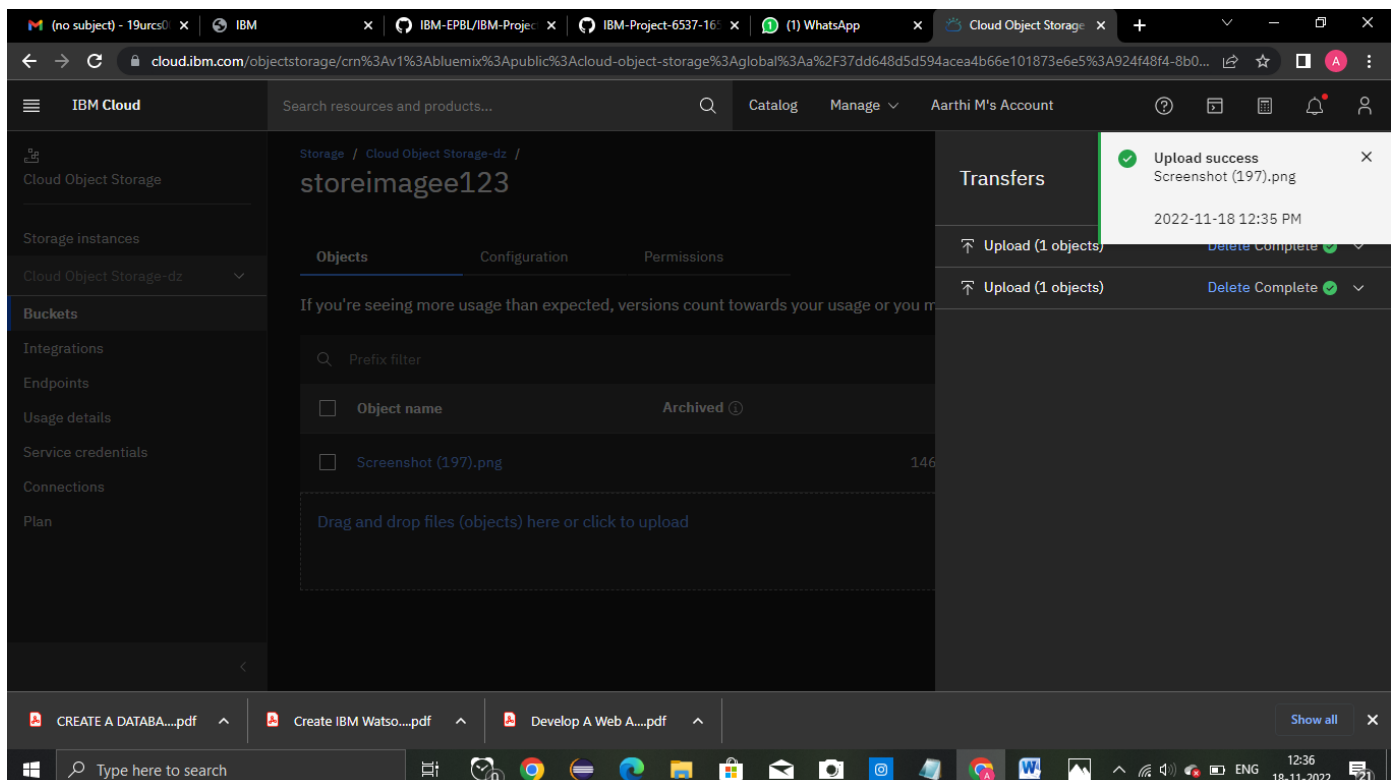

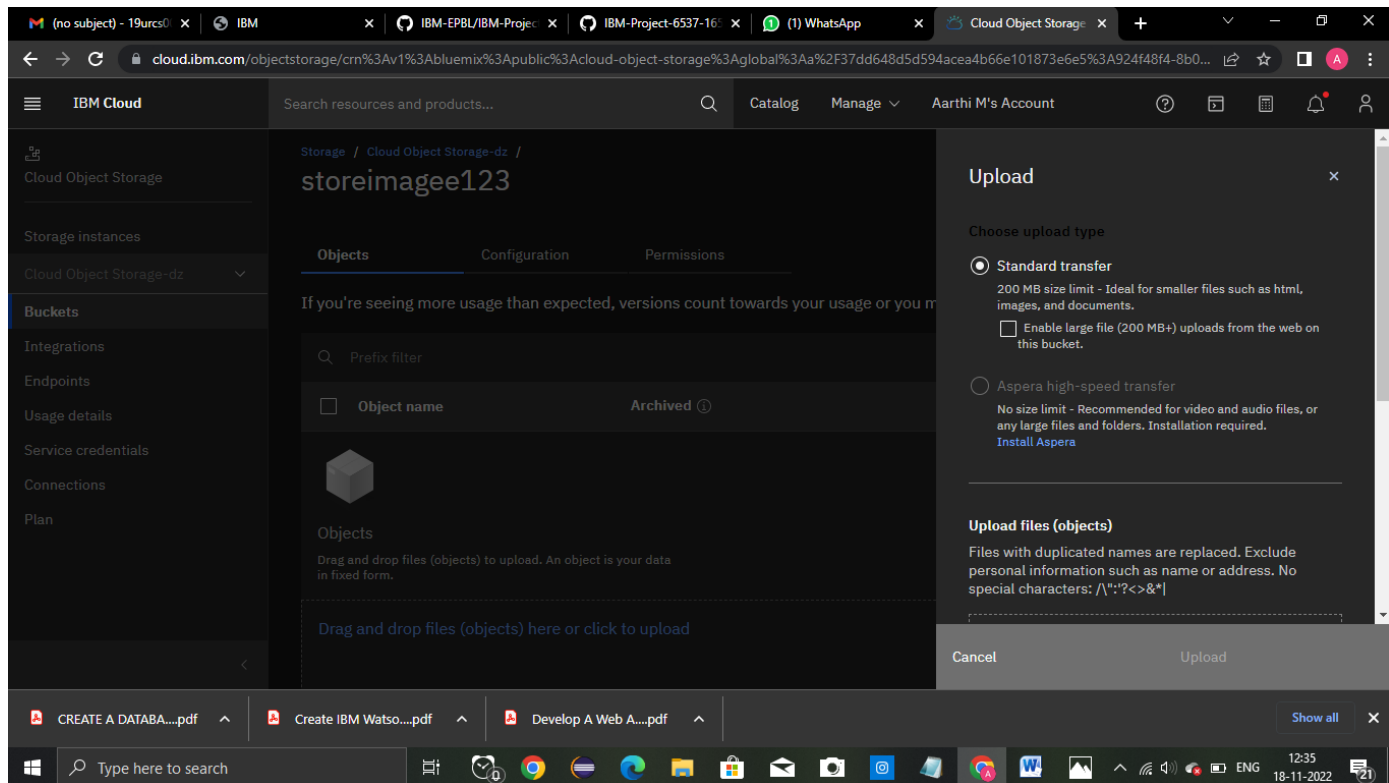

STEP6: To store image we have to create bucket for it. To create bucket, click on it and it will show the some option to create bucket the click on custom bucket and it open as shown below and provide details their ask and click on create bucket.

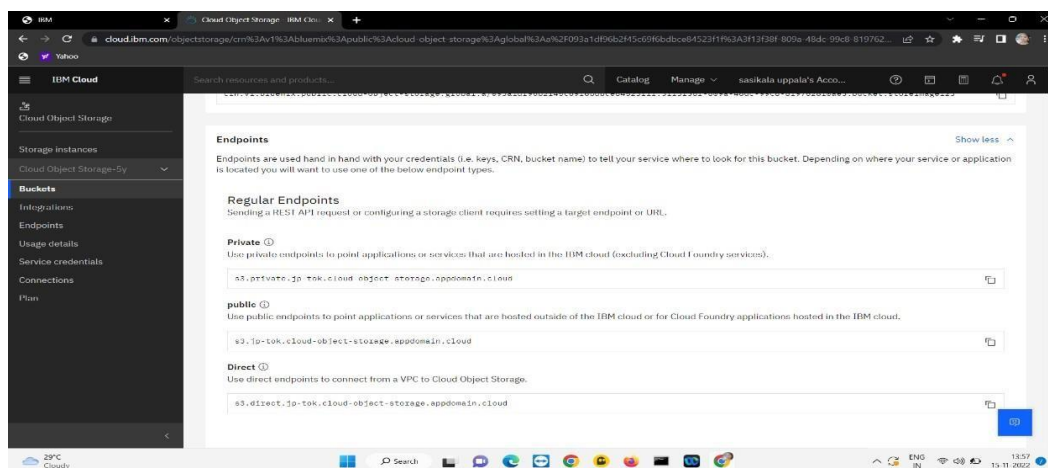

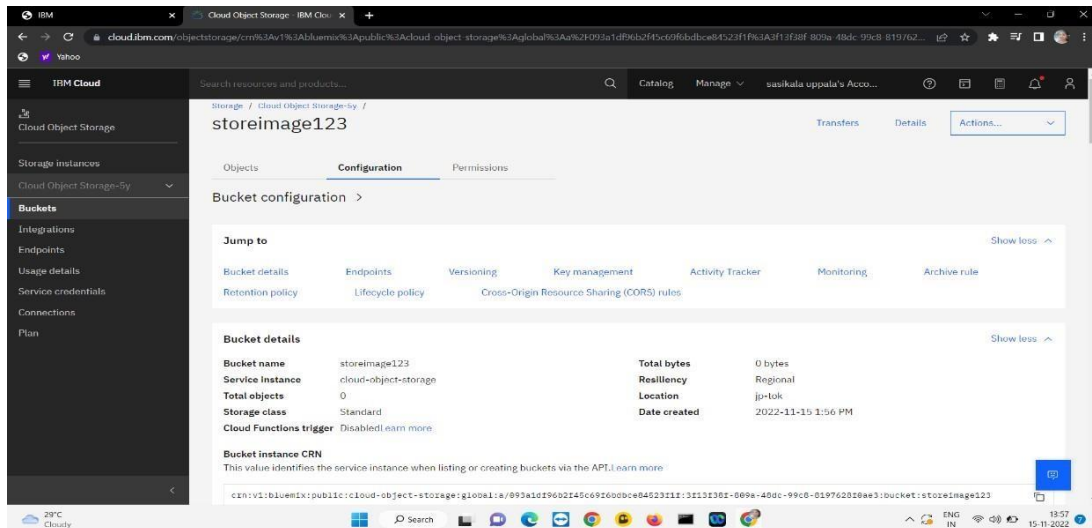

STEP7: Then you get observe bucket is created successfully. And to store the images drag and drop files shown in below picture.

## STEP8: Now you can see observe configuration settings as shown.

STEP9: Here you can see the endpoints which is used for programming.

STEP10: The important part is service credentials for programming integrity.
